Profile

Developer with a range of skills in front end and server-side technologies. Experienced in full range of website development, but more interested in application-level opportunities. Hobbyist game developer. Military veteran with strong interpersonal, communication, and soft skills. Interested in opportunities in the Harrisburg, PA area, or remote opportunities.

Education

Harrisburg Area Community College

Jan 2010 - Dec 2011 | Associate Degree - Web Development | 3.2 GPA

Studied web development basics including HTML, CSS, and JavaScript. Took courses in Java, Apache administration, and Android app development. Utilized integrated development environment tools such as Visual Studio and Eclipse. Learned familiarity with Adobe Creative Suite.

Development Experience

GeoDecisions

Web Developer | November 2015 - Present

Constructed responsive HTML5 GIS web applications using AngularJS and utilizing the ArcGIS API, running on both .NET and Node.js backends. Extended functionality of core application base to include new features and customized implementations of existing features.

Project Opus

Developer | March 2015 - November 2015

Built interactive quizzes and games using HTML, CSS, and JavaScript to be integrated into video-based online learning course. Advised company on development practices and managed freelancer-developed work. Built prototype iOS Game using Unity3D/C# for pitching to investors, and provided crucial input for project planning and development.

Penn State Hershey

Web Content Specialist | November 2014 - March 2015

Evaluated content from FrontPage site and updated, migrated, and maintained that content on Liferay CMS site. Assisted with WordPress site issues. Developed and maintained HTML, CSS, and JavaScript for several small sites.

Andculture

Web Developer | April 2013 - September 2014

Worked with team of designers and other developers to create responsive sites using variety of technologies, primarily WordPress and PHP, SASS/CSS, JavaScript, and MySQL. Used Git/Jenkins for version control and deployment. Managed Linux servers through command line SSH. Also maintained sites using classic ASP, Ruby on Rails, and Python. Assisted in development of oAuth application. Updated iOS app to fix defunct API.

Computer Aid

Programmer | January 2013 - March 2013

Provided consulting advice and input on Dot Net Nuke CMS. Studied and practiced .NET using C#.

Pavone

Web Developer | January 2012 - January 2013

Developed websites of varying size in a small team environment. Utilized PHP through WordPress, CodeIgnitor, Drupal, and custom-built framework. Wrote WordPress plugin to add HTML5 video functionality to pages. Heavily modified .NET wizards using C# and VB.NET. Created API bridge between SOAP and REST services. Assisted in creation of Facebook marketing game.

Harrisburg Area Community College

Student Worker | June 2011 - December 2011

Maintained department site for Honors Program. Consulted for and provided support to Virtual Campus department.

Military Experience

PA Army National Guard

Infantry | January 2005 - January 2011

Served as infantry rifleman, team leader, armored vehicle driver/commander, and squad-designated marksman. Frequently relied upon as a resource to train and guide fellow soldiers on new equipment and technology. Awarded Combat Infantryman Badge, Army Commendation Medal, Army Good Conduct Medal. Honorably discharged with separation of service.

Hobbyist Programmer

Developed mobile game - *Viking Chess!* - available on iOS App Store.
